

# READY-TO-USE, SECURE AND RELIABLE WORKSPACE IN THE AWS CLOUD

## YOUR CHALLENGES

The evolution of COVID-19 to a pandemic level, and other future potential disruptive events, have forced companies to secure the health and well-being of their employees and clients by imposing remote work. This underlines the importance in deploying a fast and efficient Business Continuity Plan. Continuing your organization's business services at a normal pace during emergency events allows you to remain on top of your clients' needs. Relying on our expertise and Amazon WorkSpaces, FX Innovation teams along with AWS provide your organization the platform to immediately face today's challenges by deploying a Desktop as a Service that allows your employees to remotely and securely access your organization's information and business applications.

## OUTCOMES

### **Access your desktop remotely using your AWS Cloud infrastructure**

Cloud based virtual desktop environment for your devices allowing you to work anywhere at any time

### **Low cost virtual desktop solution**

No upfront infrastructure costs, a pay-as-you-go fee for compute, storage and applications

### **Secured and encrypted data**

Your organization's data is not sent or stored on end-user devices, the data remains in AWS cloud or in your on-premise environment

### **Quickly deploy remote work capability**

Team of dedicated experts deploy tested and ready-to-use virtual desktops

# OUR APPROACH

- 1-week deployment in your infrastructure
- Pre-built French and English image configuration
- Connectivity from your virtual private cloud to WorkSpaces

**PRICE: \$14,000**

## WHAT MAKES US DIFFERENT?

- Our 18-year experience guiding our clients in Canada, the US and Europe no matter where they are in their IT journey
