

SIMPLIFY AND EXPEDITE YOUR DISASTER RECOVERY

YOUR CHALLENGES

Maintaining your organization's business services at a normal pace during a disaster is critical in ensuring continuous services to your clients.

While disaster recovery planning, implementation and execution is a crucial part of your business continuity strategy, maintaining a secondary fully provisioned data center is expensive, time consuming and is not creating real business value for your customers.

Relying on FX Innovation's expertise and AWS CloudEndure technology, FX Disaster Recovery solution allows you to implement a best in class disaster recovery at a **reduced Total Cost of Ownership (TCO)**.

OUTCOMES

Non-Disruptive

- Highly automated machine conversion and automation.
- Avoid snapshots or heavy read/write operations to disk. CloudEndure use Continuous Data Protection which is near to zero impact on performance.

Single Disaster Recovery solution for all applications

- Supports physical, virtual and cloud-based infrastructure.
- Covers all applications on supported operating system from database to ERP.

Fast Recovery

- Recovery Point Objective (RPO) in sub-seconds.
- Recovery Time Objective (RTO) in minutes.

Mitigate the Risks

- Secured and encrypted data in your Virtual Private Cloud.
- Easily Test your Disaster Recovery solution with the click of a button.
- Supports cross-regions disaster recovery in AWS.

Reduce your costs for your Disaster Recovery Solution

- Avoid duplicating your compute and storage infrastructures in an on-premise site.
- Pay-as-you-go, only pay for your Disaster Recovery Solution when they are used; test or disaster.
- No up-front infrastructure contracts or fees for CloudEndure.

WHAT WE DO

- Personalized Evaluation of Infrastructure and requirements including current IT infrastructure, AWS capabilities, targeted RPO and RTO and cost optimization
- Best in class Disaster Recovery Design and Architecture of your environment
- Implementation of the CloudEndure architecture in your AWS Account FX best practices
- Disaster Recovery Failback and Failover testing
- Backup configuration and testing
- Continuous Monitoring and notification

WHAT MAKES US DIFFERENT?

- Our 18-year experience guiding our clients in Canada, the US and Europe no matter where they are in their Cloud adoption journey
